What does UMLS stand for?

- ◆ Unified
- ◆ Medical
- ◆ Language
- ◆ System

UMLS®
Unified Medical Language System®
UMLS Metathesaurus®

Motivation

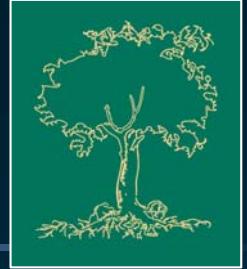

- ◆ Started in 1986
- ◆ National Library of Medicine
- ◆ “Long-term R&D project”

«[...] the UMLS project is an effort to overcome two significant barriers to effective retrieval of machine-readable information.

- The first is **the variety of ways the same concepts are expressed** in different machine-readable sources and by different people.
- The second is the **distribution** of useful information among many disparate databases and systems.»

Organize concepts

- ◆ Inter-concept relationships: hierarchies from the source vocabularies
- ◆ Redundancy: multiple paths
- ◆ One graph instead of multiple trees (multiple inheritance)

Semantic Web

Web vs. Semantic web

- ◆ Web
 - For humans
 - Cosmetic markup
 - Knowledge embedded in text
 - Heterogeneity
 - Limited interoperability
- ◆ Semantic web
 - For humans and machines
 - Semantic markup
 - Knowledge represented explicitly
 - Semantic annotation (RDF)
 - Ontologies
 - Integrates heterogeneous resources
 - Interoperability

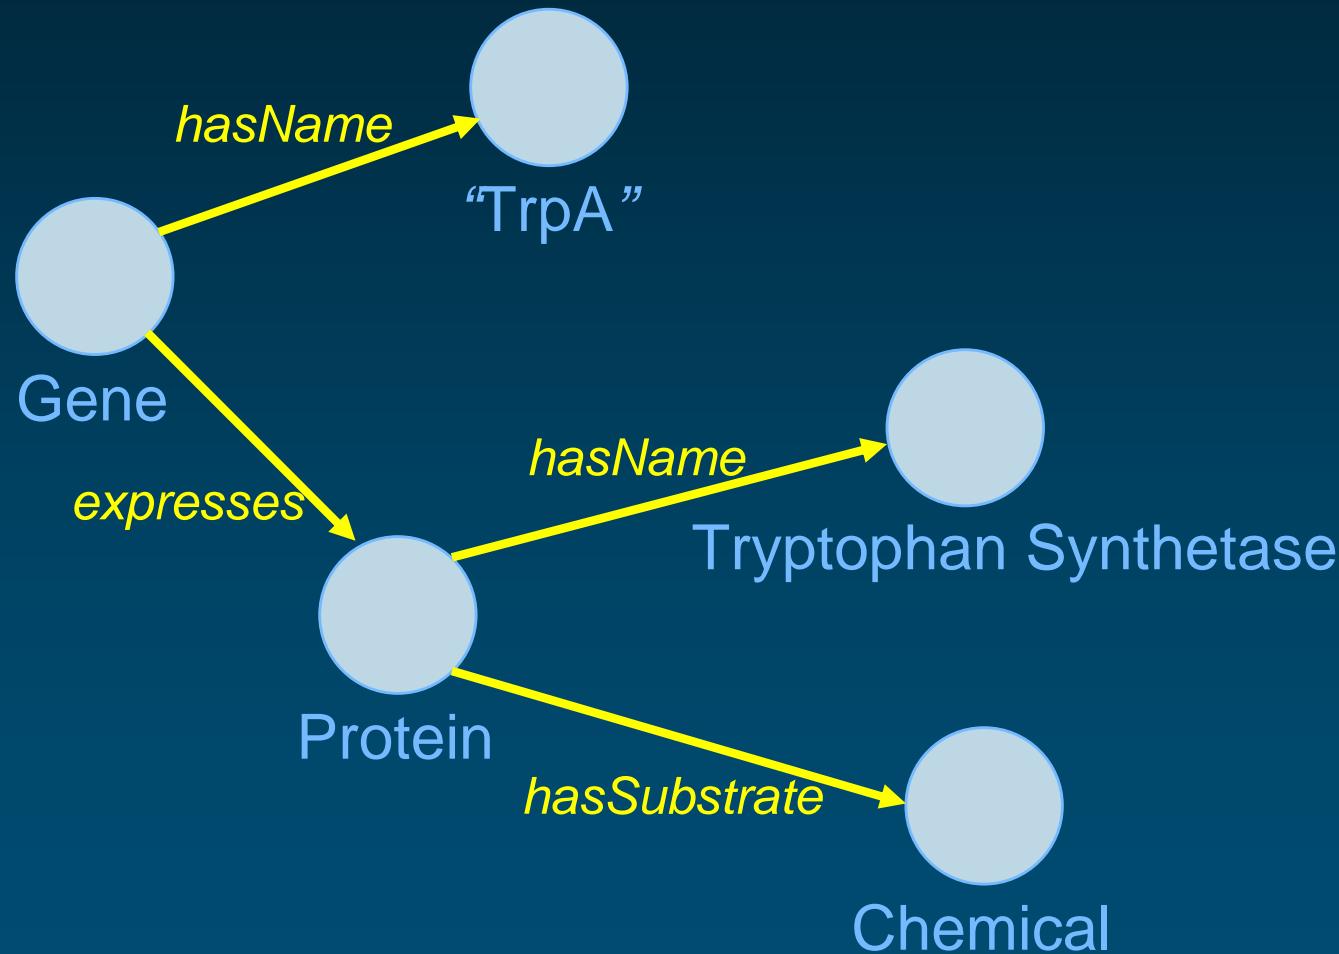

Knowledge in the semantic web

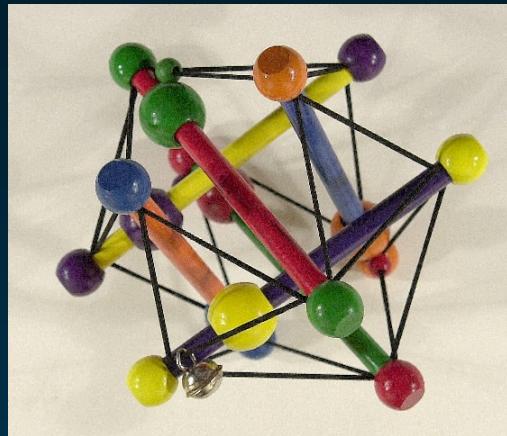

- ◆ Uniform Resource Identifier (URI)
 - Identify entities and relations
 - E.g., GO or UMLS identifier
- ◆ Resource Description Framework (RDF)
 - Triples (entity_1 , relationship, entity_2)
 - Common syntax
 - Semantic bus for applications
